Reserve your spot today!**

## TIP FROM THE PRO

A key to consistency is maintaining good arm structure in your golf swing. Its common to lose this structure by allowing your elbows to separate too much, going back and post-impact (chicken wing).

### Here's a good fix:

Wedge a head cover or soft type ball between your forearms at setup and keep it there as you swing. This will help you maintain the correct relationship between your arms and give proper shape and consistency to your swing .
